

DESCRIPTION COLUMN

Hello,

It's been brought to our attention that we need to file an enhancement opportunity for the Jobboss program.

We are in the implementation process and we've encountered many complications because of the layouts/view of different windows. While some of them show the "description" for the items, there are many that only show Material ID.

Our IDs are completely numerical, and tough we do have a sense of these codes, it is extremely complicated to be shown only the numbers and not any description.

The screenshot shows the Jobboss 2020 software interface. The main window displays a list of materials under the 'Material' tab. The list has columns for ID Material, Tipo, Descripción, Clase, UMI Inventario, Proveedor, and Dias Ciclo. The data is as follows:

ID Material	Tipo	Descripción	Clase	UMI Inventario	Proveedor	Dias Ciclo
1122100001	F	METAL 20XNT E-1 NE	PAU KOREAN	ea	0006	45
1122100002	F	METAL 20XNT E-2 NE	PAU KOREAN	ea	0006	45

We bring up this comment because we see there's still space in the windows/views that only show the ID, as to fit one more column with the description.

Most sincerely this way of working could increase our rate of errors in unprecedented ways, and/or slow the confirmation process of many tasks in order to make sure we are ordering/quoting/retrieving the right material.
